Medicine**

# Welcome to Central CPD

## PGCert programmes

### **Introducing the Central CPD PGCert course in Small Animal Internal Medicine.**

The Central CPD Postgraduate Certificate in Small Animal Internal Medicine provides vets with in-depth training to diagnose and manage commonly encountered complex medical cases. You'll refine your problem-solving skills and develop a logical, methodical approach to clinical challenges, enhancing your diagnostic capabilities. By completion, you'll be able to assess, manage, and treat internal medicine cases with greater expertise and assurance.

The course follows a blended learning format, combining online learning with in-person attendance at Central CPD's facilities in London. You can choose from the following cohort lengths:

One-year part-time

Two-years part-time

A highlight of the Postgraduate Certificate is a dedicated two-day diagnostic weekend, focusing on advanced imaging and including hands-on clinical pathology sessions to further develop your skills.

The Postgraduate Certificate is designed with input from industry specialists, providing you with valuable connections and insights into current practices.

### **Course outcomes**

The PGCert (SAIM) is validated by the University of West London and is placed at master's Level 7 within the Quality Assurance Agency's higher education framework. It provides 60 transferable academic credits towards the 180 required for a master's degree. On completion, you'll be able to pursue further career opportunities in a range of settings.

# About us

Trusted for 15 years, our team of respected small animal and exotics experts delivers a fantastic programme of over 70 high-quality veterinary CPD courses throughout the year. As well as offering great value for money, we pride ourselves on our friendly service and small class sizes, which give delegates the opportunity to get plenty of practical experience and personal tuition from our lecturers.

Our PGCert will provide you with practical training to diagnose and manage complex medical cases commonly encountered in practice. Through the course, you'll refine your problem-solving skills and develop a logical, methodical approach to clinical challenges, enhancing your diagnostic capabilities. By completion, you'll be able to assess, manage, and treat internal medicine cases with greater expertise and assurance.

## Why choose Central CPD for your PGCert?

**Flexible course duration:** Complete the course in either one or two years, tailored to your schedule.

**Blended learning:** Benefit from a flexible mix of online learning and practical attendance sessions.

**Expert-led training:** Learn from leading veterinary specialists and benefit from 1-1 clinical mentorship sessions.

**Comprehensive resources:** Access an extensive range of materials through our On-Demand portal.

**Convenient location:** Easily accessible Central London venues.

**Career-boosting qualification:** Gain a PGCert that provides a career boosting qualification. We encourage you to consult with the RCVS for specific guidance on how this qualification can be used in your application for RCVS Advanced Practitioner status.

**Personalised support:** Enjoy small group sizes for tailored guidance and support throughout your learning journey.

*“The level of education is just top tier. I would give 6 stars if I could.”*

# What does the Central CPD PGCert offer?

- It will equip you with the ability to confidently diagnose and manage small animal internal medicine cases using a systematic, evidence-based approach.
- It will promote reflective practice so that you can adapt your strategies and respond confidently to diverse and unpredictable cases.
- It will help you to advocate for ethical decision-making, patient safety, and responsible antibiotic stewardship in your practice.
- It will strengthen your communication and problem-solving skills to improve patient care and clinical outcomes.
- It will foster professional growth and self-motivation through a combination of foundational learning and applied case-based analysis.

# Course structure

The course comprises two modules and is delivered in a blended learning format, combining self-paced online learning with in-person collaboration and eight expert-led teaching sessions at our Central London venues. You'll have the freedom to complete the online learning activities at your own pace and in the order that works best for you, allowing you to build on your strengths and focus on areas you want to improve.

## Module I (20 credits/200 hours of study)

### Key principles in Small Animal Internal Medicine

This module contains 23 units, covering the following core small animal internal medicine topics:

- Endocrinology
- Urology – kidney
- Urology – lower urinary tract
- Medical ophthalmology
- Respiratory
- Cardiovascular
- Gastroenterology
- Clinical Pathology
- Haematology
- Diagnostic imaging
- Medical neurology
- Dermatology
- Oncology
- Critical care
- Clinical nutrition

You'll complete a final summative assessment at the end of Module I, which includes case-based MCQs testing core knowledge and its practical application.

## Module II (40 credits/400 hours of study)

### Case study portfolio

You'll need to submit four reflective case studies, showcasing a range of clinical topics and demonstrating a logical approach to cases. Clinical mentorship evenings will be available for you to book to discuss your case studies and gain feedback.

A dedicated online training programme will also open throughout the cohort, focusing on ethical considerations within Module II, including how to approach difficult conversations such as poor prognosis, as well as antibiotic stewardship and patient welfare.

The pass mark is 50%, with scores rounded to the nearest whole number.

# Student support

**You'll be fully supported through your learning journey with Central CPD with comprehensive resources including:**

- Full access to Central CPD On-Demand – over 2,000 veterinary videos and associated documents, covering a range of clinical and non-clinical topics
- Course notes and documents available both online and for attendance lectures
- Recommended reading lists to signpost important research and scholarly materials
- Career development and advice
- Mentorship sessions
- Optional access to online discussion forums for peer-mentoring, including our popular Small Animal Case Discussions group – a supportive community of over 6,000 vets and vet nurses
- Advice on how to access mental health and disability support

# Your PGCert tutors

The lecturers for the PGCert (SAIM) and clinical mentors for the course are all recognised veterinary specialists - RCVS, ECVS or board certified ACVIM Diplomates - and hold specialist qualifications in the small animal internal medicine field or a specific unit topic.

American and European Specialist in Small Animal Internal Medicine

# Course delivery

The course follows a blended learning format, with a mix of online learning, and in-person attendance at Central CPD's facilities in London. A highlight of the programme is a dedicated two-day diagnostic weekend, including advanced imaging and a hands-on clinical pathology session to further develop your skills.

## Online learning

Your online learning will take place via our online portal - Central CPD On-Demand - which boasts over 2,000 RACE® approved online videos available to watch anywhere and at any time.

## In-person learning

The in-person attendance sessions will be hosted at our two venues in Central London, which offer comfortable lecture facilities and fully kitted-out dry and wet skills labs on-site.

**The Clinical Skills Lab**

London SE17 3BN

**The Pickle Factory**

London SE11 4DS

# Eligibility

- Applicants must hold a veterinary qualification (i.e. BVM&S, BVetMed, BVSc, BVMSci, VetMB)
- Applicants must be registered as a member of the Royal College of Veterinary Surgeons (MRCVS)
- Applicants must have spent a minimum of one year in veterinary practice and should have completed the RCVS Professional Development Phase of Veterinary Graduate Development Programme (veterinary surgeons graduating before 2007 are exempt)
- Applicants must be currently practicing veterinary surgeons, as the course involves case-based learning that requires access to clinical cases
- As the course is taught and assessed in English, applicants are required to be proficient in the English language (6.5 - minimum 5.5 in each individual element)

If you are an international vet interested in the PGCert, please contact us for more information.

# How to enrol and fees

## Fees

The fees are **£10,700 +VAT**, which includes:

- Attendance at each of the in-person sessions and associated course notes
- Access to over 2,000 veterinary videos and associated documents via Central CPD On-Demand
- All online modules
- Case discussion sessions
- Assessments
- Academic and pastoral support
- Registration with The University of West London
- One year's free Central CPD Membership - which gives you free and discounted access to our attendance CPD courses
